

Strengthen Your Body's Natural Defenses with **IMMUNE PROTECT**

*Don't suffer needlessly
this winter season.*

Over-the-counter medications merely cover up annoying problems without addressing the real root cause of the problem: a poorly functioning or sluggish immune system.

Supplementing with the proper nutrients can help ward off potential problems by enhancing immune defense mechanisms.

Immune Protect with PARACTIN® contains a combination of patented ingredients that have been clinically shown to boost immune function, increasing the body's natural ability to combat challenges.

Immune Protect with PARACTIN® provides 100 mg of a proprietary, patented form of **beta-glucan** that has been proven to activate the immune system's primary defenders **phagocytes** and **natural killer (NK) cells**. The immune cell-priming capabilities of this patented, highly purified yeast derivative exceed those of all other sources of immune supplements tested to date.

The formula contains **PARACTIN®**, an extract derived from an herb that has been used in Asia and India for thousands of years to ease inflammation, and provides significant seasonal support. Among the active ingredients of this medicinal herb are *andrographolides*, phytochemicals that exert powerful immune-boosting effects on the human body. The formula's patented blend of these *andrographolides* helps with inflammation caused by cytokines, easing discomfort and speeding recovery. Only **Immune Protect with PARACTIN®** contains both beta glucans and Paractin® to help boost immunity *and* help with inflammation.

Immune Protect with PARACTIN® also provides 250 mg of a standardized extract of **ascorbic acid** derived from the most potent source of natural vitamin C on the planet: the camu camu berry.

"Reprinted with permission of Life Extension"

Each capsule of Immune Protect with PARACTIN® contains:

Wellmune WGP® Beta-1,3-D Glucan Complex** [Highly purified extract from baker's yeast (<i>Saccharomyces cerevisiae</i>)]	100 mg
Camu camu (<i>Myrciaria dubia</i>) Extract (wildcrafted berry) [standardized to 20% natural vitamin C (50 mg)]	250 mg
PARACTIN® (Bioactive 14-Neo-Andro Compound) (<i>Andrographis paniculata</i>) Extract (organic leaf) [patented blend of Andrographolides, 14-Deoxyandrographolides, and Neoandrographolides]	25 mg

One capsule should be taken daily, especially during the fall and winter months, when immunity is low. The Beta-1,3-D Glucan Complex takes about five days to prime the immune system for optimal protection, so daily supplementation is highly recommended. (To assist recovery, up to 6 capsules per day can be taken as needed on a temporary basis.)
